

Reducing Migration Costs by Rightsizing and Archiving Data with SAP® Solutions

Before: Challenges and Opportunities

- Need to reduce the size of the Oracle database used by their SAP ECC system to enable the migration to HANA in Microsoft Azure.
- Need to decommission legacy SAP Content Server and migrate documents to SAP IQ
- Need for an integrated and modern IT solution that has speed, ease, and works in real-time
- Requirement of a simplified solution to optimize sales and order management processes to obtain transparency and control

Why SAP and Proceed Group

- Proceed provided deep expertise in SAP Archiving using SAP Information Lifecycle Management to reduce Croda's TCO, business risks, and data volumes
- Enduring and forward-thinking relationship between SAP and Croda with the experience that SAP brings helping in the navigation of work activities, risks, and barriers to achieve the project's goals and objectives
- Cloud-based solution that effectively scales and competes with the business complexity and cost

After: Value-Driven Results

- Reduction of database size enabled the migration of Croda's SAP Business Suite on HANA to Microsoft Azure and delivered significant ongoing cost-savings without delaying the migration project
- Reduced database by over 80% delivering 2.9TB reduction in storage in less than 3 months

CRODA

“Migrating our SAP ECC6 system on Oracle to **Business Suite on HANA** was challenging because of the high operational cost of running a 3.4TB database size in memory. Reducing the database size to below 0.5TB in less than 3 months paid for the archiving project with an **ROI of below 2 years.**”

Paul Knoester, Group IT Operations Director, Croda International Plc

2.9 TB

Database size reduced by the Archiving project

>80%

Data archived on average for different archiving objects
